### **DETAILED ACTION**

1. Receipt is acknowledged of the amendment filed on May 21, 2008, which has been fully considered in this action.
2. The indicated allowability of claims 28-32, 35, 37-39, 41, 42, 48 and 51-53 is withdrawn in view of the newly discovered reference(s) to Stumpp et al and Shinogle. Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 37-39, 41, 42 and 51-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Stumpp et al.

Stumpp et al discloses an atomization system comprising a supporting device comprising a primary housing 9 and upper housing 24; metering device 11; insulating body 13/14/15; and first gap, see Fig. 1.

As to claim 42 see fixing elements 20/21.

Art Unit: 3752

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 28-32, 35 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stumpp et al in view of Shinogle.

Stumpp et al, as discussed above, discloses all the featured elements of the instant invention, except for the insulating body partly made of a ceramic material. Shinogle discloses an metering device 12/22 with an insulating body 16 which is made of a ceramic material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the insulating body made of a ceramic material, as taught by Shinogle, since such a material is well known for its resistance to heat transfer and the ceramic material would perform equally as well in the apparatus of Stumpp et al. Also, it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

***Allowable Subject Matter***

7. Claims 40,43-47, 49 and 50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3752

***Response to Arguments***

8. Applicant's arguments with respect to claims 28-32, 35, 37-39, 41,42,48 and 51-53 have been considered but are moot in view of the new ground(s) of rejection.
